Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This application contains claims directed to the following patentably distinct species of the claimed invention:

Group I comprising figures 1-3, 6a-11; and

Group II comprising figures 4 and 5.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 2, and 5 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

the prior art, the evidence or admission may be used in a rejection under 35

U.S.C. 103(a) of the other invention.

During a telephone conversation with Mr. Douglas B. Teaney on December 9, 2002 and a return call on December 12, 2002 a provisional election was made with traverse to prosecute the invention of Group I, claims 1-6. Affirmation of this election must be made by applicant in replying to this Office action. Claims 7-10 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Information Disclosure Statement

The information disclosure statement filed March 29, 2002 has been made of record with the German document cited on Form 892. No copy is provided since applicant provided a copy to the Office.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The terms "the mount" (first used in claim 1, line 6) and "the extension" (claim 1, line 10) lack clear antecedent basis. The term "the support unit" (claim 2, line 2; claim 5, line 3) lacks clear antecedent basis since the antecedent term is plural. It is suggested that the term be made plural at both occurrences. The term "the

Art Unit: 3677

dimensionally stable cross-section" (claim 5, lines 1-2) lacks clear antecedent basis and "cross-section" should be changed to --transverse section--. The remaining claims are indefinite in that they depend from an indefinite claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 5, and 6 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Glynn (US 3179969).

Glynn (figures 1-8) teaches a holding device with an operating mount in the form of bore 8 within the dimensionally stable transverse element to which a fastener can be stressed upon traction can be fixed, a securing unit in catches 20 mounted on resilient supporting units 18, 19. The material defining the bore 8 is much thicker than the resilient supporting units 18, 19. The device doesn't twist in the opening.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Schmid (US 4356987).

Schmid (figures 1-3) teaches a holding device with an operating mount in the form of an eyelet, to which a fastener can be stressed upon traction can be inherently fixed if so desired, below the transverse section 4 and between the resilient supporting units 3 that each carry a securing unit in catches 6, 7.

Conclusion

Art Unit: 3677

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents of Sokurenko et al. (US 6230372), Kern (US 1925488), Lilja et al. (US 5547322), Berns (US 3685778), Porter (US 4607991), Speedie (US 3633248), and Speece et al. (US 5676351) teach pertinent fastener structure.
